GitHub | LinkedIn | Portfolio

Summary

Computer Science undergraduate specializing in Data Science with a strong foundation in **Data Structures, Algorithms, Object-Oriented Programming, and Software Engineering**. Experienced in building **full-stack web applications** using **React.js, Node.js, JavaScript, and Firebase**, along with developing **RESTful APIs** and working with **SQL and NoSQL databases**. Familiar with **machine learning, system design, and distributed systems**. Passionate about developing **AI-driven and scalable software solutions**.

Technical Skills

Programming Languages: Python, Java, C/C++, JavaScript, SQL

Web Technologies: HTML, CSS, React.js, Node.js, Flask, REST APIs, JSON

Machine Learning: Neural Networks, Deep Learning, Model Training, Data Analysis, Model Evaluation

Databases: MySQL, PostgreSQL, SQLite, Firebase, Supabase

Developer Tools: Git, GitHub, Docker, Kubernetes, AWS, Linux, VS Code

Blockchain Development: Solidity, Smart Contracts, Polygon

Academic Projects

AgriChain — Blockchain Supply Chain Transparency Platform

GitHub | Live Demo

- Developed a **full-stack blockchain-based supply chain platform** using **React.js, Firebase, and Solidity** enabling transparent agricultural product traceability.
- Implemented a **QR-based tracking system** supporting **3 stakeholder roles** including farmers, distributors, and retailers.
- Built **6+ reusable React components** and implemented **role-based access control (RBAC)** improving application modularity and security.
- Integrated **Firebase Realtime Database** to manage and synchronize **100+ supply chain records** in real time.
- Deployed **Solidity smart contracts on Polygon blockchain** ensuring tamper-proof verification and transparent transaction logging.

GenSathi — AI Powered Companion Platform

GitHub | Live Demo

- Built an **AI-powered conversational web application** supporting real-time user interaction and automated response generation.
- Developed **8+ reusable React.js components** to create a responsive and user-friendly front-end interface.
- Implemented backend services using **Node.js and REST APIs** to process dynamic user queries and handle request routing.
- Designed scalable application architecture capable of supporting **multiple concurrent users** and efficient data processing.

Neural Networks Implementation

GitHub

- Implemented **neural network models from scratch in Python** using forward propagation and backpropagation algorithms.
- Conducted **10+ model training experiments** analyzing learning rate, hidden layers, training accuracy, and convergence performance.
- Applied **gradient descent optimization, loss functions, and hyperparameter tuning** to improve model prediction accuracy.

Education

VNR Vignana Jyothi Institute of Engineering & Technology, Hyderabad, Telangana	B.Tech in Computer Science & Engineering (Honors) — Data Science	Expected 2028 CGPA: 9.8
Pragathi Junior College, Telangana	Intermediate (MPC)	98.7%
Bhadrachalam Public School, Telangana	Class X (CBSE)	95.6%

Relevant Coursework

Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Software Engineering

Achievements

- Won **1st Place among 90+ teams** in the Software Project Contest at **CONVERGENCE 2K25**, a national-level technical symposium organized by VNR Vignana Jyothi Institute of Engineering & Technology.
- Awarded **Gold Medal in First Year** for achieving a **CGPA of 9.95**, ranking top among all branches.

Publications

- **Cheerla Sai Laasya Priya** et al., “Blockchain for Transparent and Traceable Agri-Food Supply Chains,” in *Blockchain Beyond Cryptocurrency: Innovations and Applications*, Chapter 7, pp. 1–44, 2026.

Leadership & Activities

- **Volunteer**, CSI SBC — Computer Society of India Student Chapter; collaborated with a **24-member organizing committee** to coordinate **3+ technical events and workshops** for students.
- **Event Organizer**, VJ DataQuesters — Coordinated the **planning, management, and execution** of technical events, handling logistics, participant registration, and event operations.
- **Speaker**, Navigator — Delivered a **career guidance orientation session for 250+ junior students** covering technical domains, internships, and academic opportunities in computer science.
- **Member**, Student Force — Assisted in **event operations, logistics coordination, and on-ground execution** for institutional events ensuring smooth event management and student participation.
